

RECLAIM *the* REPUBLIC.
RESTORE *the* CONSTITUTION.

GAG ACT TALKING POINTS

The right to free speech – including political speech – is a cornerstone principle of liberty. America’s founding fathers understood this and protected this right in the First Amendment to the U.S. Constitution’s Bill of Rights.

Politicians want you to believe “Gag Act” bills will clean up the political process, but the legislation actually protects legislators from criticism under the guise of “reform” and are a direct violation of our constitutionally protected rights.

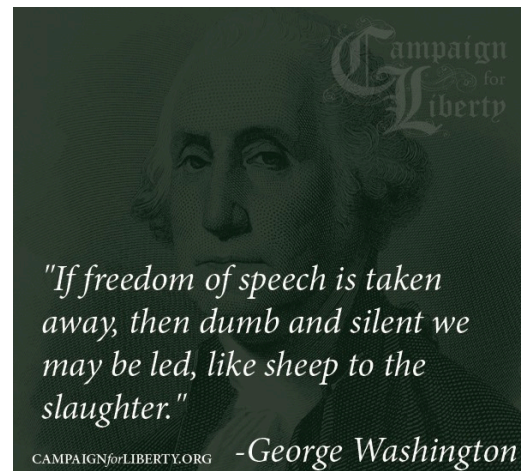

“Gag Act” legislation will have a chilling effect on political speech - causing citizens and the grassroots organizations they support to go silent, thus allowing legislators to operate in secrecy and hide their true positions on crucial legislation.

These bills will serve to allow politicians to secure their power in office by silencing the grassroots and ensuring their constituents will never learn of their freedom-shredding votes.

Elected legislators should be accountable to the people they represent, but these bills will allow them to shield the truth from their constituents, removing all accountability.

Merely exposing a legislator’s anti-liberty voting record would become a crime without government “permission.”

The onerous requirements needed to get a government stamp of “approval” would include a total loss of privacy for supporters of grassroots organizations.
