

RECLAIM *the* REPUBLIC.
RESTORE *the* CONSTITUTION.

Kentucky will soon have the opportunity to end the failed ObamaCare expansion experiment – if you take action NOW.

As you know, Governor Beshear forced ObamaCare down the throats of Kentucky citizens without legislative approval.

The good news is we CAN get rid of ObamaCare expansion in 2016.

But ObamaCare lackeys are turning up the heat in an attempt to continue the budget-busting program.

And I'm alarmed to tell you that according to recent reports, Governor Bevin appears to be wavering on ending ObamaCare expansion. According to media sources, he's now saying he will "apply for a federal waiver" to let the state design their own plan.

But citizens don't want ObamaCare under a new name - the 2015 election is proof of that!

It's absolutely critical Kentucky citizens send the message to Governor Bevin to stand strong on his campaign promise to END ObamaCare expansion, so please sign the petition below and ask your friends and family to do the same.

RECLAIM *the* REPUBLIC.
RESTORE *the* CONSTITUTION.

Whereas: The United States Supreme Court ruled Medicaid expansion an optional piece of ObamaCare; and

Whereas: Governor Beshear expanded Medicaid unilaterally, without the advice and consent of the Kentucky Legislature; and

Whereas: Kentucky citizens have made clear they want the optional program to end; and

Whereas: Kentucky taxpayers cannot afford the burden of any ObamaCare expansion scheme.

Therefore, be it resolved that we, the citizens of the great state of Kentucky stand opposed to Medicaid expansion in any form and urge our State legislators and the governor to move to END the program immediately.
